Julia,

Good morning and please see attached. In addition, I have provided the final test report for this project. Please let me know if this information needs to be uploaded to VERIFY.

Thanks,

Andy Meloeny

Hello all,
Yes, I am looking for a copy of the technician's ledger.

Julia,

Good evening. If I could jump in on your questions regarding the application.

The application is strictly for a 5-gallon container. The references to the testing on page 25 and 26 are included because the CFR states, "Report all results, including those from invalid tests or from any other tests, whether or not they were conducted according to the test procedures of 59.650 and 59.653...". The data contained are from other certification runs that Midwest conducted during their certification program.

And with regards to the Technician's comments, what are you exactly looking for? The technician's ledger is just a confirmation of what instructions he completed.

Thanks,

Andy Meloeny

Subject: PFC family HMDCPPFCSTMTL

Hi John,

I'm a bit confused by the document for PFC family HMDCPPFCSTMTL. Page 6 of 33 lists only a 5.0 gallon PFC for this family. Page 25 has data for a 2.0 gallon PFC. What are the capacity or capacities of the PFCs included in this emissions family? Is it only a 5.0 gallon capacity, or is it 5.0 and 2.0 gallon capacities.

Page 26 shows the 2.0 gallon container tested using CARB LEVIII fuel. EPA will not accept this data. I'm assuming this is the same 2.0 gallon container design used for the testing summary on Page 25.

Can you please clear this up for me? Also, can you please send me the page with the technician's comments during the tests? Thank you!

Life's too short. Eat dessert first!
